

Complex Stroke Management

Learn from a panel of experienced Allied Health clinicians as they discuss Chris, a patient with a complex stroke presentation requiring multi-disciplinary input.

We will discuss the stroke presentation of Chris, and follow his pathway through the healthcare system. Our panel will reflect on their experience and explain their assessment, management and treatment of this patient.

While key learnings are relevant for all allied health professionals the webinar content is aimed at early years clinicians who don't have frequent exposure to complex stroke patients.

Date **Thursday 2 March 2023**

Time **1.00-2.30pm**

Location

Online via Zoom
