

WORKSHOP: DEVELOPING COLLABORATIVE PRACTICE SKILLS

Do you supervise students?

This **research** and **professional development** opportunity is for clinicians who provide workplace-based training for students from health and social care professions.

What's it all about?

Participants will explore their personal encounters and perceptions about other professions and develop insights into how these experiences shape their practice as health professionals and clinical educators, and discover what this means for student learning about interprofessional collaborative practice.

What does it involve?

Zoom into
one of our
free
workshops

Complete a pre &
post-workshop
survey
